

Palauan Name: Chebicheb  
 Scientific Name: *Heritiera littoralis*  
 Family Name: Malvaceae

Chebicheb is found at the landward edge of the mangroves, along channels or rivers through the upper part

of the mangroves. It is a medium size tree that can grow to 15 m in height and has a trunk diameter of 50 to 200 cm, often buttressed. The wood is used as lumber and the buttress trunk is used for

storyboards and handicrafts.
